GUNNS PLAINS ROADWORKS

WHAT

Roadworks will soon commence to repair significant landslip and storm damage to Gunns Plains Rd and Lowana Rd. McPhersons Rd bridge is also being replaced at this time for logistical reasons.

Road closures at point of works will be necessary due to the challenging nature of the works and the narrow road and steep embankments.

Access to businesses and private properties will NOT be blocked – however some detours will be necessary.

WHEN

The tenders for works were awarded at the Council Meeting on 23 September 2024. Due to the difficult and dangerous landscape, work must be undertaken over the warmer months.

Works are due to commence in mid-October and may take 3 months to complete.

HOW CAN WE HELP YOU?

Council is committed to minimising disruptions whilst ensuring these important works are undertaken safely. Signage will be in place to direct/detour road users.

Should you have any questions or concerns - please contact the Project Manager.
